Seeking Positions As:

1. WordPress Web Developer
 2. Account Manager
 3. Web Designer
 4. Digital Marketing Specialist
 5. Graphic Designer
-

Howdy,

Here is a quick introduction, I'm from Houston, TX. My wife and I are in the process of moving to Lancaster, PA to be close to her family.

About four years ago we began studying web design and development and built the first website for Eco Power Wash, Inc on a Wordpress (CMS platform). Next we built a website for This Ole' Coupe from ground up with HTML5, and CSS3. After a few more websites we realized the importance of digital marketing, so I poured myself into taking numerous courses on Lynda.com and have completed over 63 courses to date. Currently I'm learning JavaScript and JQuery. I have applied my learning to This Ole' Coupe and they are now receiving business internationally.

I am seeking a position as a Front-End Web Developer/Designer, Account Manager, Digital Marketing Specialist, or Graphic Designer. I have three strong attributes: I'm driven to learn and succeed. Second, I have excellent communication skills. Third, I have strong personal and business ethics. I can produce reference, and recommendation letters upon request.

Best Regards,
Chad Popham
